WORK CLASSIFICATION: NEW ADDITION REPAIR EVALUATION

TYPE OF SEPTIC SYSTEM:

ENGINEERED

SYSTEM DESIGNER: _____ PHONE: _____

SOIL REPORT (MUST COMPLETE WORKSHEET)

For septic tanks and drainfields, a report from a Certified Soils Classifier or a Certified Soils Testing Agency, that indicates the soil types and specifications for an individual site and the property is suitable for the location of a septic system on the site as per the current North Dakota Plumbing Code, is required prior to issuance of a permit. As an alternative, installation of three hundred and fifty (350) square feet of drainfield per bedroom, installed in accordance with the applicable requirements of the North Dakota Plumbing Code, will be allowed and a permit issued for such installation. The Inspections Department will conduct an inspection of the septic tank and drainfield to insure the installation complies with the North Dakota Plumbing Code.

Trench length cannot exceed four(4) feet in depth and two (2) feet above any water or mottling. Individual runs shall not exceed 100 feet. Installation must comply with planning requirements for the installation of such a system. Water well depths less than 100 feet require a distance of 100 feet. A report from a soil testing agency/soil classifier indicating the testing for presence of soil mottling or water is required. The following is intended to assist you with planning requirements for the installation of such a system.

WORKSHEET

Number of Bedrooms (including proposed): _____

Septic tank size/working capacity (in gallons): _____

Trench Depth: _____

Trench Width: _____

Total Trench Length: _____

Distance from House (in feet): _____

Distance from Water Well (in feet): _____

Distance from Property Line (in feet): _____

I hereby apply for a septic tank and drainfield permit and I acknowledge that the information provided is complete and accurate: that the work will be in conformance with the ordinances and codes of Burleigh County and with the ND Health Codes. I understand this is not a permit by only an application for a permit and work is not to start without a permit: and that the work will be in accordance with the approved plan in the case of all work which require review and approval of plans.
